Animal Anatomic Pathology Practice is a compulsory course of the major of veterinary medicine. The course is based on the courses of Animal Anatomy, Animal Physiology, Animal Histology and Embryology, Animal Biochemistry, Animal Immunology, Animal pathological physiology, Animal Surgery, and so on, and lays the foundation for Animal Epidemiology, Animal Internal Medicine, Animal Toxicology, and Animal Parasitology. Animal Anatomic Pathology Practice is based on Animal Anatomic Pathology, checks morphological and histological changes of organs tissues and cells by naked eyes, and illustrates the interaction between pathological changes and clinical symptom. Meanwhile, this course will provide a theoretical underpinning for clinical diagnoses, therapy, and prevention.
